Course Description

BUSI 2400 [0.5 credit]

Foundations of Information Systems

Management issues associated with information systems in organizations. Definition, description, fundamental technologies impacts and development of information systems, and associated ethical issues.

Prerequisite(s): second-year standing.

Lecture three hours a week.

The School of Business enforces all prerequisites.

This course will help students understand the critical role that information systems play in the innovation and productivity of every Canadian industry. The Sprott School of Business recognizes the growing innovation gaps and the challenge of developing skills in our students for a fast-evolving and changing business environment where information and communication technologies (ICTs) play a significant role in the transformation. The skills needed are rooted in studies of both information technology and business. This course is the door to these topics for many students.

Since organizations are becoming more virtual and people will be working with clients and colleagues they may never meet face to face their skills using ICTs will determine their success in the workplace. Many jobs that are here today will be eliminated, and new jobs will take their place. Change will be driven by people familiar with both business knowledge and technology skills.

Course Objectives

The main goal of this course is that students experience the Management of Information Systems. To achieve the goal, students are expected to:

- Understand what information systems are and the way they are used in organizations
- Explain the role information systems play in managerial decision-making
- Understand the impact ICTs have on Productivity, Innovation and Strategy
- Explain how IS are used for competitive advantage, and
- Assess the challenges associated with the management of information systems

Software

This course requires Microsoft Office 2016. Please note, Mac users can get this software by accessing *My Carleton Desktop* – through a Client/Server application available to students in this course. Instruction on getting the client software and installing it in your own devices are available in the course CU Learn site. This also applies to students having a different version of Microsoft Office.

Grading

Your final grade will be composed of the following:

- **Individual Assignments 30%**
 - Excel (15%)
 - Access (15%)
- **Group Work**
 - Group Report (10%)
 - Group Presentation (10%)
- **Midterm Examination 25%**
- **Final Examination 25%**

There is a CU Learn site for this course. It is important that you visit the site regularly to stay on top of the course's expectations. When communicating with the instructor, please use the email procedures associated with the course. Email procedures will be explained in class 1.

Individual Assignments

These are INDIVIDUAL assignments! That does not mean that you can't discuss them with your classmates, on the contrary, working with a classmate is a good way to study and prepare.

If your submission is past the assigned due date, you'll receive zero for the assignment

Group Work

You will be assigned to a group of 5 or 6 members. The Group will be assigned to one topic on new trends in MIS: Big Data Analytics, Robotics, Artificial Intelligence & the Internet of Things. On the last session of the course each group will make a 5-minute presentation on the assigned topic. Please note that **all members** need to be present during this session to receive full marks.

There is a Peer Evaluation component for this assignment.

In Class Midterm Examination

Made up MC questions

The only valid excuse for missing the midterm is for medical reasons or death in the family and must be documented with a medical certificate. Any other reason (such as travel, etc...) cannot be considered. In such circumstances, separate arrangements may be made.

University Scheduled Final Examination

The university Exams office will schedule the final exam for all three sections of this course on the same day during the examination period at the end of the term.

Group work

The Sprott School of Business encourages group assignments in the school for several reasons. They provide you with opportunities to develop and enhance interpersonal, communication, leadership, follower-ship and other group skills. Group assignments are also good for learning integrative skills for putting together a complex task. Your professor may assign one or more group tasks/assignments/projects in this course. Before embarking on a specific problem as a group, it is your responsibility to ensure that the problem is meant to be a group assignment and not an individual one.

In accordance with the Carleton University Undergraduate Calendar (p 34), the letter grades assigned in this course will have the following percentage equivalents:
