Your grade will depend on the following individual and group contributions:

	Max marks
Individual assignments	
1. Sales funnel	20
2. Fund growth	20
3. Network required to grow (10 weekly posts)	20
Sub-total individual assignments	60
Group assignments	
4. Business model (Interim)	15
5. Business model (Final)	15
6. Presentation final of Business model	10
Sub-total group assignments	40
Total marks	100

*Satisfactory In-term Performance

To pass this course, individual capability must be demonstrated. Students must achieve a minimum grade of 50% of the total of individual assignments, in addition to other requirements. Given the experiential nature of the course, attendance is mandatory. Missing more than 2 classes without a certified reason (e.g. medical certificate) will lead to failure in this course regardless of the performance on assignments, presentations and reports.

Group work is an important component of this course given the realities of entrepreneurship and the business world in general. Group conflicts are to be dealt with by the group in a way that is fair, respectful and fast. I do not settle group disputes. A group is defined as:

- Students who are actively working together to start a new business
- Students who are interested in coming up with an idea to start a business

- A group is NOT two or more students getting together to reduce workload on an assignment or business model. Students in a group have to be actively working together towards a common business goal
- Maximum size: 3 students
- All groups have to be initiated by week 3 of the course

Although I do not anticipate such situations, a word of caution about free loaders. The best way to deal with free loaders is to not include their names on the first page of the group assignments. If a student's name does not appear in an assignment submitted by his or her group, the student must submit his or her own assignment. Failure to do so will result in the student receiving zero for the assignment.

Further instructions regarding evaluation elements will be posted on the course site. **All written assignments will be submitted on CuLearn. Late assignments are not accepted.**

Before embarking on a specific problem as a group, it is your responsibility to ensure that the problem is meant to be a group assignment and not an individual one.
