Participation (15%)

Classroom participation & professionalism (10%): Students are expected to make a solid attempt at case analysis each week. To improve at case writing, practice is required. These marks are awarded for active participation during case debrief discussions and on Brightspace discussion boards. A portion of this grade will go towards the completion and submission of two approximately 90-minute multi-competency cases written on **Friday, May 26 from 9:00 – 12:00**. The case will be provided in print copy and will be due for submission via the Brightspace assignment drop box no later than 12:15. Please submit both a Word and Excel file for each case, where applicable. Students are expected to attend each class and behave respectfully with peers, faculty, and guest lecturers.

Peer evaluation (5%): Students will be asked to peer review one of the multi-competency cases written on May 26 (to be assigned by the Instructor) in an anonymous process. Students will be provided with another student's case response (anonymously), the suggested solution, and an evaluation guide by the instructor. Students are required to provide feedback on the other student's case response using the resources provided by **Monday, June 5 at 23:59**. The following week, students will receive the feedback on their personal response. The 5% is awarded based on the student's effort in providing valuable feedback to the other student, *not* on the quality of feedback they received from their peer.

LATE ASSIGNMENTS AND EVALUATIONS:

To ensure fairness for all students, penalties will be applied to late case submissions. Late submissions will receive a 1% deduction for every minute past due. Submissions overdue by greater than 30 minutes will be given a grade of zero. Additional time is provided in advance to control for technical difficulties. A late case will still receive feedback if submitted within 24 hours of the due date.

Requests for extension will be considered in cases of illness, family emergency, or other exceptional circumstances.

REQUIRED MATERIALS:

On Brightspace:

- Cases for weekly assignments; drop boxes for submission
- Link to the CPA Competency Map; CFE Blueprint; CFE Appendix

Access to the CPA Handbook:

- Go to www.library.carleton.ca
 - Search for: "CPA Canada Standards and Guidance Collection"
 - Choose the first item that comes up
 - Enter your CarletonOne login and password
 - You are now on Knotia, which has access to the "CPA Canada Standards and Guidance Collection (CPACHB)", which houses the Accounting (IFRS and ASPE) and Assurance standards in Canada. We will be using this frequently in class, and should be a main resource you utilize while writing case responses.

As this is a summative course, it is highly recommended that students prepare for the cases in these courses through active review of prior Master of Accounting course technical content and required texts. Advanced Concepts I (5120) and II (5121) are necessary foundations for success.

CLASSROOM STRUCTURE

Every class will address one comprehensive or multi-competency case (covering topics from all prerequisites listed above). The case(s) must be prepared as homework during an on-campus case writing session before class in a fixed 5-hour window.

Case debriefs are interactive. Students are encouraged to volunteer insights from the homework and ask questions.

CASE ANALYSIS FOCUS:

- Identification of role and what that will mean to the communication of the response
- Identification of users of the response and of the financial statements; what are their needs/biases and how will this impact your analysis/conclusions
- Identification of the case requirements and the information available in the simulation to resolve these requests; identification of analytical approach to take
- Consideration of case timeline and whether this will impact any of the requirements
- Ranking of issues and consideration of time allotment
- Identifying areas that integrate/affect each other
- Analysis: CPA Accounting & Assurance Handbook criteria, discussion of reasonable alternatives, quantitative analysis, qualitative analysis, and other techniques such as WIR, RAMP, etc.
- Conclusion on each requirement/issue
