COURSE DESCRIPTION

Emphasizes contingency approach to training and development; relevant to organizations of all sizes and resource capacities. Effective training and development is conceptualized as a process that integrates extensive front and back-end planning, implementation, and evaluation activities.

OBJECTIVES

This course provides the foundation for Training & Development: To prepare you to lead the Introduction to Organizational Behaviour course. In the context of this mission, the objectives of the course are:

- to help you develop into an effective teacher who can help others to learn effectively and efficiently using experiential methods in interactive sessions;
- to enhance your ability to work collaboratively with a teaching partner, with small groups, and with the larger organizational community, including professors.
- to develop your leadership skills that will help you become a more effective student while at Carleton and an effective manager and leader in your organization, community, and society upon graduation.

TEXT

The following text will be provided to you for the first term:

Osland, J. et al. *Organizational Behavior: An Experiential Approach* (8th edition). Upper Saddle River, NJ: Pearson. ISBN 0-13-144151-5. Journal articles accessible online may be used in winter term.

-Technical requirements include a webcam and microphone for online discussion.

COURSE REQUIREMENTS

All students must attend the 3-day orientation session to be prior to the first week of interactives. The purpose of the orientation is to prepare you to learn and practice skills in critical thinking, communication, and team building while developing and demonstrating advanced knowledge of course content. The orientation is intended to help you prepare to present the course material to students and manage class discussions and experiential exercises within your interactive sessions.

In partnership with another 4111 participant, you will teach one interactive session of maximum 25 students in each of the two terms. You will also manage your section's interactive learning site and evaluation. Pairing selection and announcements will take place during orientation. Your partner will change for Winter term.

4111 class sessions will be used to consolidate your mastery of OB theory and of applied exercises and simulations for the interactive classes. Specifically, each 4111 class in the Fall will be devoted to preparing for the next interactive class, with a pair of Trainers responsible for leading a run-through of the material and exercises. The presenting pair may be asked to meet in person or in a telephone meeting with one of the professors for specific coaching prior to their 4111 session. The run-through will always be followed by feedback from participants on content and process, geared to aid the learning of all the Trainers.

You must be fully prepared for each 4111 class, having studied the chapter content, and relevant teaching outline for the upcoming interactive class. This advance preparation is imperative for success in teaching your classes; remember that 4111 runs on Thursdays during the first term and you will be teaching on your interactive session the following week. Attending the BUSI 2101 lecture each Monday will assist you in this, and in making relevant links between lecture material and interactive class material to help your students' understanding. At least one member of your pair must attend each Monday lecture.

You will meet periodically with your mentor to discuss any concerns you might have, clarify expectations, and set goals.

In the Winter term, 4111 class time will be used to explore selected Training & Development topics in greater depth.

RESPONSIBILITIES

In the Training & Development community, everyone must function as a resource for everyone else. In a course like this where skill building is central, and feedback from others is essential, wholehearted involvement and effective contribution by every person is crucial. Therefore, all of us must be responsible for creating and maintaining an effective learning environment.
